Professional Summary

Self-taught and project-driven Frontend Developer with a background in operations and a passion for building clean, responsive, and user-focused web applications. Transitioned from operations at Tazapay into freelance web development by designing real-world React.js projects for clients, family businesses, and self-learning. Strong foundation in React, JavaScript, and UI design with hands-on experience across the entire dev cycle.

Professional Experience

Frontend Developer (Freelance)

Self-Employed / Client-Based Projects

Jan 2023 – Present

- Built fully functional React.js projects including login systems, dashboards, API-driven apps, and note managers
- Designed reusable UI components and deployed live sites via GitHub Pages and Netlify
- Delivered web tools to family and partner-led businesses for client-facing use
- Collaborated on project scopes, iterations, and post-deploy feedback cycles
- Maintained full GitHub project base to showcase skills and growth

Operations Associate

Tazapay (Easier Trades India LLP)

Oct 2022 – Mar 2024

- Executed core operational tasks including data review, reporting, and process flow documentation
- Supported cross-functional teams to address client issues and internal process optimizations
- Engaged in technical exposure and informal product logic conversations during day-to-day work
- Started learning React.js and frontend development in parallel during this time

Inside Sales Associate (Remote)

Justdial (Freelance Contract)

Mar 2021 – Oct 2022

- Supported B2B clients with inquiry handling, CRM data logging, and WFH onboarding
- Handled 100+ calls daily and maintained accurate reporting for lead conversion
- Developed communication and soft skills, later applied in freelance client interactions

Technical Skills

- React.js, JavaScript (ES6+), HTML5, CSS3
- Git, GitHub, GitHub Pages, Netlify
- API Integration, Axios
- React Router, Conditional Rendering
- Form Validation, State Management
- Chart.js, LocalStorage, Responsive Design

Projects

To-Do List App

[Live Site](#) | [GitHub](#)

CRUD operations, localStorage persistence, responsive layout

Weather App

[Live Site](#) | [GitHub](#)

Live API fetch, async/await, error handling, conditional rendering

Expense Tracker

[Live Site](#) | [GitHub](#)

Interactive charts, form handling, real-time budget visualization

Notes App

[Live Site](#) | [GitHub](#)

Rich-text editing, saving to browser storage, responsive UI

Login & Signup Page

[Live Site](#) | [GitHub](#)

Form validation, password match logic, basic auth structure

Portfolio Dashboard Website

(In Progress)

Personal React portfolio site with routing, modular layout, and resume download
